VOL – 3/2012

Oct 2012

Dear Readers,

The first six months of the current financial year has been very promising and encouraging. The “Gutkha Effect” was not felt by us thanks to our customers who have ramped up their investments in better printing machines and Quality Assurance systems.

The world’s most preferred Web Inspection & Print Process Management System “**BST PREMIUS**” which was till recent past getting installed only on European presses has now found its way on Premium Indian make gravure press manufactured by Uflex, Pelican, Raulimex and Expert.

We are winning business contracts from companies in Africa, Middle East, Thailand, Sri Lanka, Nepal & Bangladesh and we expect it to continue to grow as customers are appreciating and experiencing the quality we deliver.

I am pleased to announce the acquisition of BETA CONTROLS GmbH by our partners BST INTERNATIONAL. This acquisition adds Thickness Measurement System in our product portfolio. BST Sayona also happens to be the first in BST group to have got its first order of “Thickness Measurement System”. I take this opportunity to thank the management of Caprihans India Limited on awarding their prestigious order.

It is my pleasure to announce our association with Renova SRL, Italy and have started marketing their range of multi-disk pneumatic brakes which achieves high torque values combined with minimal wear and heat generation, which is not possible with standard turbine type mono-disc brakes currently available in the market.

Once again I thank all my business partners for their tremendous support and understanding.

With Warm Regards and Best Wishes,  
Tappan Patel

## NEWS

BST PREMIUS digital is successfully installed on Experpac 3000 ELS Rotogravure Press.

Uflex Group ordered their 100<sup>th</sup> **CLS PRO** Color Line Scan Camera based Line/Edge Guiding system for their Slitting machines.

BST SAYONA attributes special thanks to Mr. R.B. Singh, Mr. Sanjay Sabharwal, Mr. Ajay Bisht and their sales & technical team for their continued faith on our technology & service-support.

**CLS Pro 600**

## RAULIMEX

**The first Indian OEM to purchase and supply BST PREMIUS digital on their newly designed high speed ELS rotogravure press.**

## NEWS

*It pays to be positive*

Endorses its confidence in BST Sayona by ordering **PREMIUS digital** & **SHARK 4000** to modernize their printing facilities at India & Dubai .

# caprihans

The manufacturers of PVC Films and a part of Bilcare Group have ordered “State-of-the-Art” **beta control** Thickness Measurement System for their PVC film line.

This is to inform that our Manager - Technical Support Mr. Kashyap Joshi has left the organization and is no longer working with us.

betacontrol®

BST International GmbH, a subsidiary of elexis AG, acquired 100% of the shares in betacontrol GmbH & Co. KG, Freudenberg.

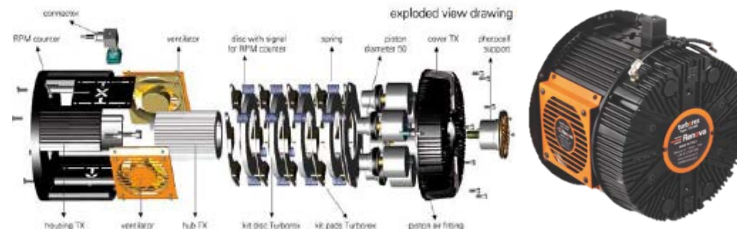

With this holding the BST Group is expanding its current technology portfolio in the area of quality assurance systems for the paper, plastic, film and converting industry.

With the acquisition of betacontrol GmbH & Co. KG, BST is adding to its technological expertise particularly in the area of “online thickness measurement of sheet materials”, with the product focus on measurement and testing.

Betacontrol thickness measurement & test systems are highly versatile and can be used in the production of the following products:

Floor coverings, felt, textiles, non-woven fabrics	Carbon plates
Galvanized layers	Rubber layers over tire cord
Adhesive foils	Artificial leather
Plastic sheets and foils	Enamel coatings
MDF panels	Metal foils and sheets
Paper and core paper	Foam rubber and foam materials
Sanding cloth	Plywood panels
Packaging of all types
