

Kabra Extrusiontechnik bags the EEPC Star Performer Award!

Kabra Extrusiontechnik has bagged the prestigious EEPC Star Performer Award in the large enterprise category (Western Region) for exports of miscellaneous special purpose machinery during 2012-13.

The company received this award at the hands of Hon'ble CM of Gujarat Mrs. Anandiben Patel in a grand awards function organized by EEPC in

Ahmedabad on 14th November 2014.

The citation consists of an attractive trophy and a certificate recognizing

KET's contribution to India's machinery export during the above period.

EEPC India (formerly, Engineering Export Promotion Council) was set up in 1955 under the sponsorship of Ministry of Commerce & Industry, Govt. of India, for export promotion of engineering goods, projects and services from India. EEPC India aggressively peruses a number of activities & services with a two-point objective of facilitating exports of Indian engineering products & services to the global market and to provide the overseas buyers true value.

Kabra Extrusiontechnik has always applied special efforts for exporting its high class plastic extrusion plants. Having installations in 72 countries, Kabra is a popular brand among plastic processors in SAARC, Middle East, Africa, Latin America and other parts of the world. Kabra's exports have steadily grown in recent years.

As described by G. Arif Khan (General

Manager – Exports, Kabra Extrusiontechnik)

- "We provide cost effective solution to plastic pipe & film processors and at the same time maintain high standards of quality. The processors in international market are increasing looking for economizing the expenditure. This provided great opportunity to Indian machine makers. The negative experiences after using machines from some other Asian country have also compelled the processors to explore better alternatives particularly from Indian companies. We realize the expectations of the processors. We stand by them in their hour of need by way of our outstanding customer support. We are striving to create a better branding and image of Indian machinery in the world market."

BST Sayona is now "BST eltromat India Pvt. Ltd."

BST Sayona Automation Pvt Ltd. has rechristened itself to "BST eltromat India Pvt. Ltd." This move is in line with the global merger to align ourselves with all the other BST Eltromat subsidiaries. Plus the tremendous brand equity of Eltromat stands for "first-class technology, innovative & well proven".

BST eltromat India is armed with new prices and strategies to re-launch arguably the World's Most Advanced

Packaging Technology
