SELECUT 9000

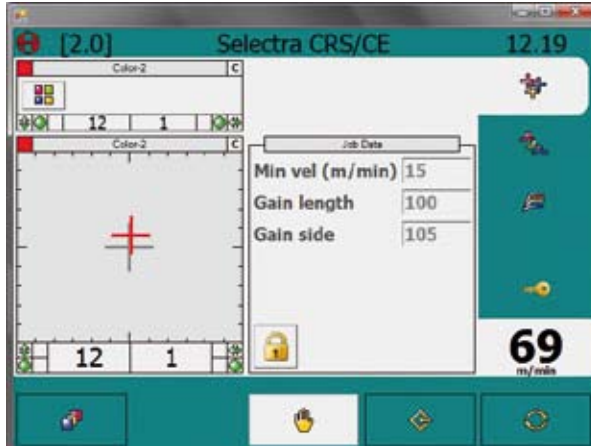

The **SELECUT 9000** is an automatic register control system combined with superb engineering and very precise manufacturing technology. It is the result of fine engineering like an intelligent, demand oriented combination of technology and simplicity.

The **SELECUT 9000** is the innovative system working with a touch screen LCD monitor which makes operator's life easy and enhance job quality. This sophisticated system integrates a supervisor software including histogram of production.

The **SELECUT 9000** is adapt to work with printing presses, coating and laminating machines, punching, folding, die-cut and cut-off machines. It improves strongly your production granting high quality output.

SELECTRA – fiber optics system
A new view of high performance

THE CUT-OFF CONTROL

FEATURES

- Fiber optics scanning head
- LED lights
- Windows touch screen interface
- Sensibility: 0,01 mm
- PID algorithms
- Automatic Mark Recognition
- Digital oscilloscope
