SELEVISCO 9000

The **SELEVISCO 9000** is an automatic viscosity control system combined with superb engineering and precise manufacturing technology.

Selectra Lamella viscosity controls are all about making life easy. The viscosity sensor checks the actual thickness and automatically corrects it by adding diluents.

The ink saving is then granted.

The **SELEVISCO 9000** is the innovative system which makes operator's life easy and enhance job quality.

SELECTRA – vibrating viscosity system
Less moving parts. More Productivity

THE VISCOSITY CONTROL

This sophisticated system can integrate a supervisor software including statistics and data storage.

Using the **SELEVISCO 9000** certifies your production granting high quality output.

FEATURES AND OPTIONS

- Vibrating Technology measurement
- Teflon Coating
- Easy Cleaning system
- pH control
- Multiple solvents control
- Temperature control
- Washing units

SIMPLY PERFECT
